FABOXYST 0.3.0

Showcase complet

Syntaxe · paramètres · LTR / RTL · cadres de page

Mode d’emploi de ce document

Chaque commande publique du package a **sa page**. En tête : la signature complète. En dessous : **chaque paramètre visuel** est montré au moins deux fois (valeur A / valeur B) en **LTR** et **RTL**, pour que le changement d’aspect soit lisible. Les bulles de discussion (références jointes) et les cadres pleine page ferment le volume.

Boxes

fabox, flag, lace, ornate, scrapbook…

Typst 0.15.1 · package local · 2026

What's new · 0.3.0

The **antique** vintage effect: aged paper, sepia ink, Garamond, broad-nib engraving drawn with **nibart**; the sketch engine is pure Typst (no WebAssembly).

Theme

`#show: faboxyst.with(theme: themes.antique)` — every box in sepia ink (`#272119`) on aged cream paper (`#F3EAD9`), Garamond-first font stack, nearly-straight engraved strokes (`roughness: 0.35`).

Engraving

`#cadre-grave` / `#engraved-frame` (double rule + corner diamonds), `#regle-gravee` / `#engraved-rule` (plain, dashed, pressured), `#engraved`, `#nib-stroke`, `#nib-pen`, `#nib-polylines` — true calligraphic nibs drawn by **nibart**.

Plates

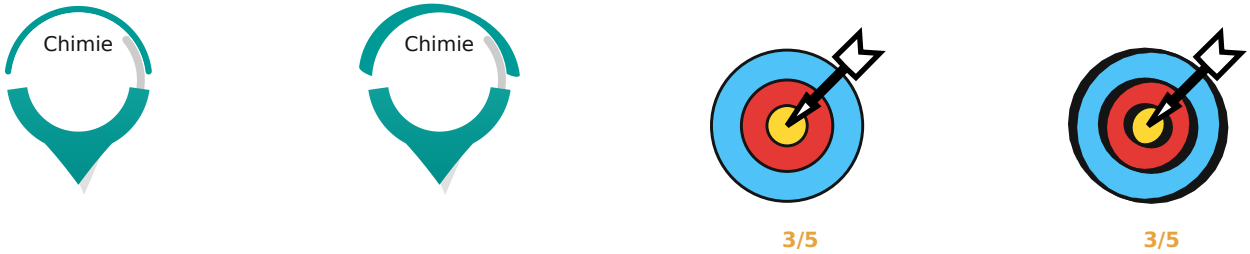

`#planche` / `#plate-page` and `#brevet` / `#patent-page` — full-page vintage styles (smallcaps number, Garamond title, italic subtitle / patent office, number, date). `#legende-figure`, `#etiquette-gravee`, `#antique-notes` / `#antique-note`.

Engine

No WebAssembly any more: the sketch engine (`src/sketchcore.typ`) is pure Typst and the antique register is drawn with the **nibart** package. The page frames (`*-pages`) moved to **nibframe**; the manifest licence is `MIT`.

The vintage: parameter

Every box, frame, meter, pictogram and cover now takes `vintage: true` (plus `vintage-pen: (a, b, angle)` to override the nib): only the **strokes** are redrawn with the elliptical nib — fills and the native palette stay untouched. 55+ families, from `leconbox` and the ten `meter` styles to `vintageframe` (8 styles), `vintagebox` (6 plaques) and `book-cover` (10 styles — a double engraved rule around the cover).

native · `vintage: true` · native · `vintage: true` — the strokes alone are redrawn, the fills stay

Content sizing and inline marks

Content boxes now hug their measured body with `width: auto` and `height: auto`; `plankbox` also accepts `leading:` and explicit `height:`. Inline marks accept `fill:` for `fan` / `bracket` and `inset:` for the hand-drawn kinds.

The frame above is the envelope of an elliptical nib carried around the rectangle — thin where the pen runs with the line, full where it is crossed. Everything in this corner of the manual is now **slightly older than its metadata suggests**.

Fig. 0 — `cadre-grave` under `themes.antique` see `examples/antique.typ` and `examples/patent.typ`.

```
#import "../lib.typ": *
#show: faboxyst.with(theme: themes.antique)
#show: planche.with(number: [Plate I], title: [Elementary Solids])
#cadre-grave[A double engraved rule, corner diamonds included.]
#regle-gravee(from: (0pt, 0pt), to: (12cm, 0pt), dash: (lengths: (14pt, 6pt)))
```
